REBEL WALLS #5 11

A City Rises

A city map with a spectacular level of detail and unusual perspective. The original map from 1912 describes the extraordinary reconstruction of downtown San Francisco after the city was hit by not only an earthquake, but also a fire in 1906. The Panama Pacific Exposition of 1915 is shown prospectively.

A watercolor world map that brings life and energy to every wall and every discussion.

MEMORIES & WANDERLUST

It's almost impossible not to interact with a world map. To point out where you live, where you've been, what countries and cultures you would love to experience. In short - a map on the wall engages and evokes conversation.

Wanderlust

Speaking of wanderlust - this wall mural will evoke the adventurer in you in no time!

Our designer Johanna used both chalks and special blackboard pencils to create this typography-loving design. Her favorite travel destination has company of a tiger, curry and tea. Can you guess which one?

Oxford Clay

Oxford Clay is the name of the subtle yellow-beige area at the upper left edge. All of our historical maps are tenderly hand-coloured with breathtaking beautiful colour combinations.

CO-CREATION

Our design services

Do you have a design idea for a wallpaper and need help realizing it? Or do you want to adjust the colour in one of our existing wall murals? When it comes to design everything is possible and our designers loves helping out, no matter how big or small the project is.

Sometimes we happen to create really cool co-creative services to, semi-free, you might say. Like YOUR STREET.

YOUR STREET. LITERALLY

Do you live on a fancy address? Seen from above? Our guess is that you do! The design service YOUR STREET was developed as a local complement to our global wallpaper collection MAPS and the price / m2 is therefore the same as for our other map murals. If you are interested in seeing your street as a map wallpaper this is what we need from you:

- Your address - street, city & country
- Style of map - ORIGINAL, MEADOW or BLACKBOARD

We will design and send you a cost free suggestion within a few days.

Your Street, Original

The design of the map is depending on how the infrastructure looks around your street. Roads, houses, roundabouts and canals is what makes the pattern.

GREEN REALITY

An uncluttered and easy to navigate map style in soft blue and green tones. The street names are written in capital letters and a distinct black. Roundabouts and roads form beautiful and meandering patterns on the wall.

Your Street, Meadow

MAPS | YOUR STREET, MEADOW

PINK PASSION

The background of this pattern consists of a somewhat crazy photo collage of a flower meadow. Both illustrated and photographed cut out flowers create a vibrant background to the grid formed by the city blocks. Roads and water have gotten a light colour and a lovely paper structure.

All the street names are correct. Perfect when you need to guide a friend that is not familiar with the area to the nearest bus stop.

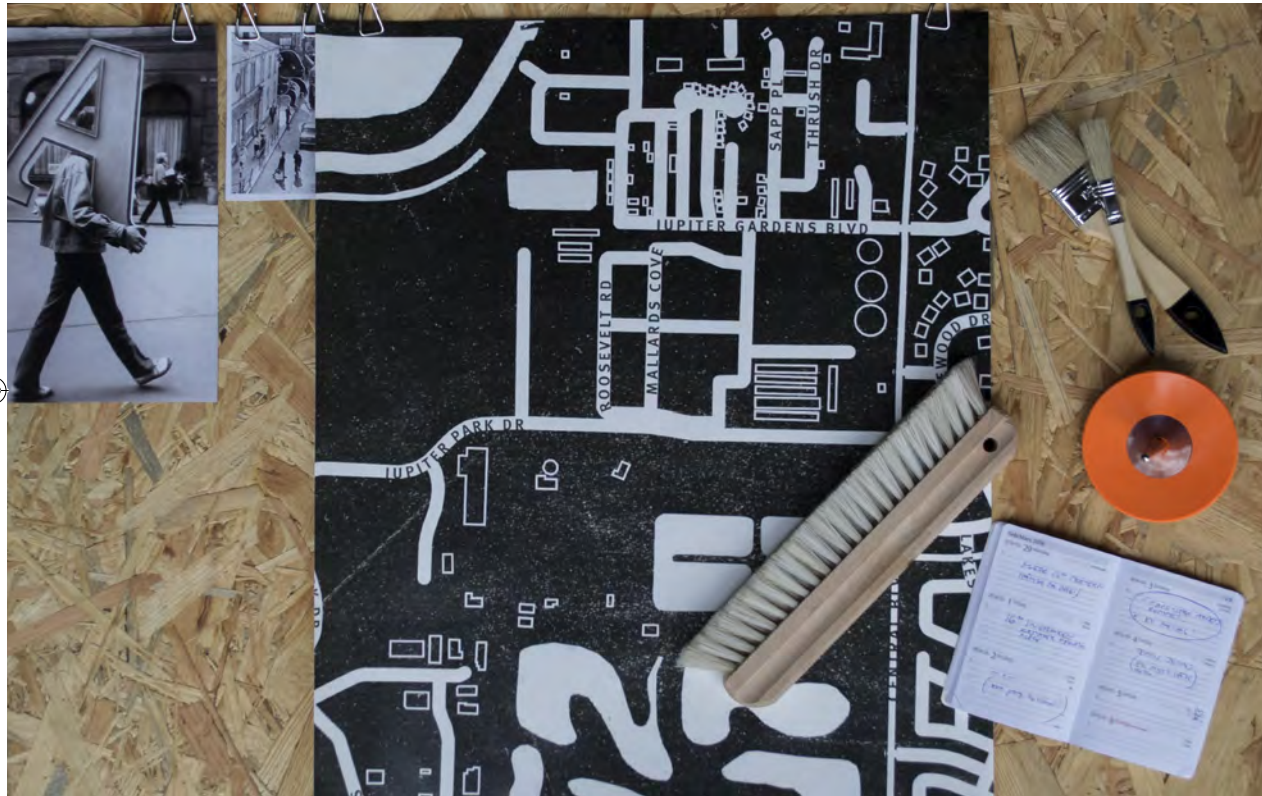

Your Street, Blackboard

Perfect for the hallway back home, or perhaps for the entrance of your work!

MAPS | YOUR STREET, BLACKBOARD

BLACK BEAUTY

The graphic oriented person should fall for the aesthetics of this style of map. The land mass is mostly black as it rests on a rough blackboard, whereas roads and rivers are depicted in the purest of white.
