Discover Concrete

Concrete on the wall. Yes, this is the ideal material for an industrial look or minimalistic living style.

However, our "Concrete" collection is much more versatile, as the concrete-look non-woven wallcoverings also perfectly complement many other living styles.

Non-woven wallcovering collection

10,05 m length x 0,53 m wide

Taste collection

40 wallcoverings & 8 murals

For example, masonry harmonises brilliantly with the country house style. In shabby chic, the unusual washed out look features with subtle shimmering glitter effects. The non-woven wallcovering with the clever shadow play of leaves creates the perfect boho chic look. And the graphic circles round off the retro style

The colours also show that concrete doesn't always have to be just grey. Light colours such as silver grey, light beige, greige, terra and off-white, and contrasting robust colours such as dark green, anthracite, dark blue and golden brown provide a wide range of options.

**Creative chaos
with shine**

In addition to popular designs, this collection is characterised by an extremely rugged feel and a high level of stability. Consumers and tradesmen are impressed by the considerable impact resistance and enormous durability of these non-woven wallcoverings.

The new surface finish also significantly improves the wallcovering's longevity. Hanging is noticeably easier, as the wallcovering can now be positioned more easily and more firmly on the paste bed. At the same time, the wallcovering is forgiving to poorly prepared walls with rough and uneven surfaces and can be applied to give an extraordinary appearance.
