«FA' A SAMOA — ENJOY THE SWEETNESS OF LIFE»

«Talofa!» – a happy "Hello" from the island group SAMOA. In search of new and exciting designs for our brand EMIL & HUGO, this time it has taken us to the most relaxed island in the South Sea. Here, the dolce color niente is still part of the culture of life. So you can take a cool stroll past the TARO banana plantation or be impressed by numerous waterfalls and palm forests, including CASCADE and UPOLU.

You will be able to discover a lot on the trail of our designs of the same name: The reputation of the national bird MANUMEA accompanies its journey to the Samoan capital APIA. They enjoy breathtaking views of the TAFUA rainforest reserve or the coral reef PALOLO and dream into the landscape of the famous volcano MATAVANU.

SOUTH SEA ISLAND:

Our insider tip: Why not visit a Fiafia in the evening and celebrate Fa'a Samoa – the Samoan way to live.

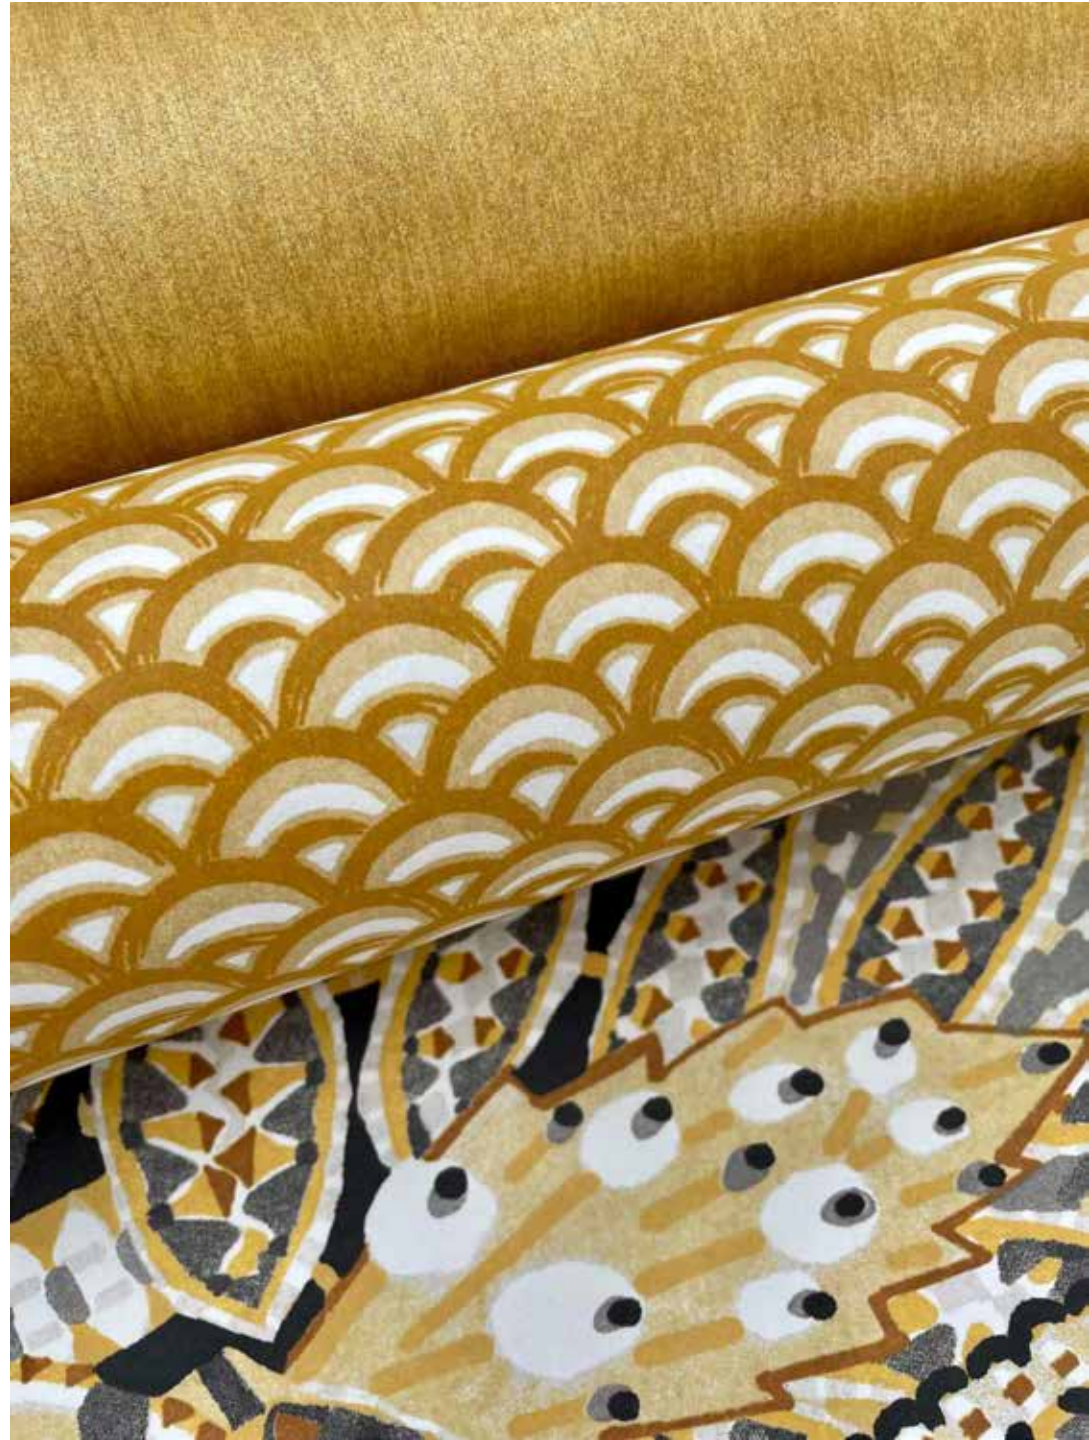

HAVE YOU GOT A TASTE FOR IT?

Then we recommend our E&H SAMOA wallpaper collection to you, which includes all this and much more. Bring the spirit of the South Sea island into your 4 walls. You can look forward to our new wall scenes TAFUA, UPOLU and CASCADE_digital and discover the full range of possible combinations.

You don't have time? Still have an appointment? This can wait or as the Samoan says «E mafai ona fa'atali!»

The SAMOA collection comprises 30 design wallpapers and 16 unis from the SHINE and STONE series in nonwoven-direct and digital printing techniques. In addition to subtle living colours such as off-white, champagne and linen, you will also find real eye-catchers in emerald, dark petrol, coral red or anthracite gold.

The «Emil & Hugo» label celebrates the life's work of the two founding fathers of the wallpaper factory. We proudly remember our roots, which continue to inspire the creative power of our designers to this day.

TAFUA

Inspired by the Tafua Rainforest Reserve near the coastal village of the same name, this vibrant design was created: A mix of patterns and colours to put you in a good mood. Here, it was subtly composed and coloured and a harmony was created that awakens all your senses. Coconut palms, giant ferns and fan-like giant foliage in naively playful painting style crowd close together. Available in yellow-grey, blue-red, wasabi-curry and emerald-peach colours.

TILLANDSIA

The family member of the tropical bromelia as a trademark of Samoa is, of course, a must. The TILLANDSIA wallpaper is shown in energetic leaves layered on top of each other. The graphic look with soft colour contrasts and a play of matte/gloss gives it a strikingly elegant and decorative character. TILLANDSIA is available in off-white, warm grey, dark petrol bronze and anthracite gold bronze.

APIA

The APIA wallpaper is a harmonious wallpaper with a soft, matte-gloss drawing of building fragments in palm idyllic, reminiscent of the capital of Samoa of the same name. From above, the city shows exactly this typical Caribbean mixture of architecture and vegetation.

APIA is available in off-white, champagne, red, anthracite gold, wasabi and emerald.

PALOLO

Palolo is one of Samoas' unbelievably beautiful coral reefs. Our wallpaper with the same name features an all-over stylised coral head in an evenly applied arch shape. Matte and 2-coloured, always on a white background, the design looks wonderfully vibrant and maritime on the wall. Available in off-white, yellow, champagne, coral red, emerald and aqua-grey.

MANUMEA

The landmark of the Samoans is the Manumea beaked toothed pigeon. They are threatened with extinction and even honoured with coins and stamps. Our wallpaper design showcases the stylised featherwork with a perfectly coordinated interplay of colours, which creates a fascinating depth effect. Shimmering surfaces support this effect and transform this design into an absolutely contemporary interpretation of Art Deco.

We offer MANUMEA in the colours off-white aqua, champagne, warm grey, blue-green, anthracite gold and dark green.

TARO

It's like a free flight high above Samoa overlooking the Taro banana plantation. From there, the shrubs look finely leafy and the banana grapes shimmer pearly to golden in the sun. TARO is a wonderfully textured pattern, but also looks like a faux-uni due to its surface effect. It is available in off-white, warm grey, anthracite gold and dark petrol.

CASCADE_DIGITAL

This colourful and lively digitally printed wallpaper is inspired by the Togitogiga waterfall on the Samoan island of Upolu. Its special feature is the many rock projections on top of each other, which cause the water to fall down in cascades: A fascinating natural spectacle that invites you to linger.

300405

300382

300399

The image is a digital artwork depicting a Samoan landscape. In the foreground, a dark wooden table holds a green and white patterned bowl and a dark bowl. To the left, a wooden shuttered window is partially open, with a large green monstera plant in front of it. The background is a vast, colorful landscape with a large volcano in the distance, a body of water, and rolling hills. The colors are soft and interlocking, creating a dreamlike atmosphere. The word 'SAMOA' is written vertically on the right side of the image.

MATAVANU_DIGITAL

This catchy and rhythmic name belongs to the famous, still active volcano of the Samoan island of Savai'i. We think it fits perfectly with our panoramic wallpaper, which interprets the volcano landscape of Samoa in a picturesque way. The soft interlocking of the colours creates exotic wanderlust for the viewer in all 3 colours.

UPOLU_DIGITAL

Fully ripe coconuts hang on the towering palm tree crowns, and numerous tropical leaf plants grow underneath them. And we can also see such a South Sea idyllicity that is so typical of the Samoan island of Upolu far in the distance. The purely black and grey-toned scenery of the digitally printed wallpaper blends discreetly into its living environment in terms of colour, but with an impressive motif.
